2025 HSCI Adoption Success Stories

Clay and Godiva both came from HSCI after being overlooked, and both went on to change their adopter's life in unexpected ways. Godiva offered steady comfort through life's hardest seasons, while Clay later joined the family with a joyful spirit and instant affection for everyone he met. Their bond fills the home with warmth and laughter, reminding us that shelter dogs are **never unwanted, just unseen**. Because of community support, dogs like Clay and Godiva get the chance to become exactly who they were meant to be.

Sugar Plum now thrives in her home with Rhea and her cat, Cori Cat,.An independent spirit, she has learned to peacefully coexist with her feline roommate through patience, consistency, and understanding. Today, Sugar Plum enjoys lounging with her person and exploring the art studio she now calls home, a happy reminder of how animals can **flourish once given the time and space they need to succeed**.

Looking ahead to 2026, we are excited to turn community generosity into tangible improvements for animals in our care. Support from our Home for the Holidays campaign is making long-awaited dog floor renovations possible, creating a safer and healthier space for dogs, staff, and volunteers. With continued community support, HSCI will keep building programs that give animals the time, care, and opportunity they need to thrive.

Nicole Watts **Executive Director**
